

Segall Bryant & Hamill Wins Investor's Business Daily Best Mutual Fund Awards

March 26, 2021, Chicago — Investor's Business Daily (IBD) today announced that Segall Bryant & Hamill (SBH) received two IBD Best Mutual Funds Awards. This recognition was based on each fund's outperformance versus its benchmark for the 1-, 3-, 5-, and 10-year periods ending 12/31/20.

The Segall Bryant & Hamill Fundamental International Small Cap Fund (WTIFX – retail class) was recognized within the Best International Mutual Funds category. The Fund invests primarily in small cap companies from developed international markets that we believe have significant upside potential relative to our estimate of their intrinsic value. The Fund was recognized in 2020 as well.

The Segall Bryant & Hamill Plus Bond Fund (WTIBX – retail class) was recognized within the Best U.S. Taxable Bond Funds. The Fund seeks to achieve long-term total rate of return consistent with preservation of capital and takes advantage of inefficiencies in the fixed income market by identifying high-quality, overlooked issues that offer a measurable return advantage.

"We are pleased to have the SBH Funds be recognized by IBD across asset classes," said Philip Hildebrandt, Chief Executive Officer. "This highlights our consistent investment approach regardless of asset class."

This year's Best Mutual Funds Award winners were drawn from a universe of 3,525 mutual funds in operation for at least 10 years. In 2021, 877 funds beat their performance benchmark across all four periods evaluated, compared to 691 in 2020. Funds are ranked according to their 10-year performance.

An investment in the Funds involves risk, including possible loss of principal.

Foreign Investment and Emerging Markets Risk: Foreign investments can be riskier than U.S. investments. Potential risks include adverse political and legal developments affecting issuers located and/or doing business in foreign countries, currency risk that may result from unfavorable exchange rates, liquidity risk if decreased demand for a security makes it difficult to sell at the desired price, and risks that stem from substantially lower trading volume on foreign markets. These risks are generally greater for investments in emerging markets, which are also subject to greater price volatility, and custodial and regulatory risks.

Micro-, Small- and Medium-Sized Company Risk: Investing in the securities of micro-, small- and medium-sized companies generally will be more volatile, and loss of principal could be greater than investing in the securities of larger, more established companies.

Fixed Income Risks: Fixed income funds are subject to additional risk in that they may invest in high yield/high-risk bonds and may be subject to greater levels of liquidity risk. Additionally, investing in bonds entails interest rate risk and credit risk. In general, as prevailing interest rates rise, fixed income securities prices will fall.
