INVESTMENT PHILOSOPHY

We seek to take advantage of inefficiencies in the fixed income market by identifying overlooked issues that offer a measurable return advantage and meet our quality standards. Our focus is on fundamental analysis and disciplined risk controls rather than market timing, and our consistent process seeks to perform well in all periods with an emphasis on downside protection. The strategy seeks to achieve long-term total rate of return consistent with preservation of capital.

KEY FEATURES

- Invests in diversified portfolio of securities with typically less than 10-year average maturities.
- Focuses on investment grade domestic, U.S. dollar, cash-pay bonds that are registered with the SEC.
- Seeks to take advantage of inefficiencies created by small issue sizes and rating agency classifications.
- Uses bottom-up bond selection and quality focus create a portfolio that may differ significantly from peers and the benchmark.
