Inception of the Strategy: 1/1/08

INVESTMENT PHILOSOPHY

We use in-depth proprietary research to uncover investments that have the potential to offer consistent returns over the long term and downside protection through market cycles. We view significant improvement in Return on Invested Capital (or ROIC) and its by product, free cash flow, as the ultimate driver of underlying equity value. We look for companies with management teams focused on driving improvements in ROIC that also have defensible competitive advantages and low embedded expectations. This combination leads us to companies capable of compounding value over time by generating strong free cash flow, reinvesting that cash at increasing rates of return, which results in increasing equity value.

KEY FEATURES

- Utilizes a fundamental, bottom-up approach designed to identify companies with improving business models that have the capability to generate significant improvement in ROIC over the investment horizon.
- Employs proprietary screens to limit the universe to companies with low embedded expectations.
- Leverages our investment process with the goal of identifying catalysts of change for improved returns while guarding for risk.

PORTFOLIO CHARACTERISTICS
