INVESTMENT PHILOSOPHY

We seek to take advantage of inefficiencies in the fixed income market by identifying overlooked issues that offer a measurable return advantage and meet our quality standards. Our focus is on fundamental analysis and disciplined risk controls rather than market timing, and our consistent process seeks to perform well in all periods with an emphasis on downside protection. The strategy seeks to provide current income and competitive total return.

KEY FEATURES

- Invests in shorter maturity securities (typically less than 3 years).
- Focuses on investment grade domestic, U.S. dollar, cash-pay bonds that are registered with the SEC.
- Seeks to take advantage of inefficiencies created by small issue sizes and rating agency classifications.
- Generally overweight corporate bonds.
- Utilizes bottom-up bond selection and quality focus to create a portfolio that may differ significantly from peers and the benchmark.

Disclosures

SBH provides fee-based management of fixed income and equity portfolios for institutional clients and high net worth individuals. Gross results do not reflect the deduction of management fees, are shown net of trading costs, and include the reinvestment of all dividends and interest. Net returns are shown net of management fees and are calculated by applying the current fee schedule applicable to the Short Term Fixed Income composite accounts is 0.20% on the first \$25 million of assets and 0.15% over \$25 million of assets. Actual fees will vary. All information is based on U.S. dollar values.

Investment Risks: Income is not guaranteed and will vary. There are risks associated with fixed-income investments, including credit risk, interest rate risk, and prepayment and extension risk. Bond prices fluctuate inversely to changes in interest rates. Therefore, a general rise in interest rates can result in the decline in the bond's price.
