### INVESTMENT PHILOSOPHY

We seek to take advantage of inefficiencies in the fixed income market by identifying overlooked issues that offer a measurable return advantage and meet our quality standards. Our focus is on fundamental analysis and disciplined risk controls rather than market timing, and our consistent process seeks to perform well in all periods with an emphasis on downside protection. The strategy seeks income exempt from federal income taxes and is managed to provide a high income stream.

### KEY FEATURES

- Seeks to emphasize after-tax total return while preserving and enhancing capital.
- Utilizes active yield curve, credit, and structure positioning.
- Focuses on taking advantage of inefficiencies within investment grade credit and bond structures to maximize total return while matching the interest rate risk profile of the underlying index.
